AIRMAN SST COLLECTION

**GLYCINE**
SINCE 1914

AIRMAN SST

SST (Supersonic Transportation) was a big event in the '60s.
The quest to manufacture a passenger jet traveling above Mach 1
was the name of the game back then .

In the year 1967 Glycine marked this period with a special run of
Airman timepieces called the Airman SST.
The futuristic color choice of a orange inner rotating bezel made
this serie remembered as the 'pumpkin ' .

After more than 50 year Glycine is happy to bring back the
exploring spirit of this collection with a new worldtimer dial which
will display all timezones for every destination you want to visit
keeping always in mind where we come from: Bienne.
